

Tech Data Sheet

Ceramic Glaze

Classification:

- Surface sealant/water repellent

Product Description:

Ceramic Glaze will easily last 30-45 days once applied to the vehicle surface. The coating becomes wear resistant after 24 hours. It offers a long-lasting protective layer on all vehicle surfaces. It protects against all types of environmental elements, including UV rays and acid rain.

Features & Benefits:

- One application can last up to 30-45 days
- Allows insects and bird droppings to be removed from the vehicle surface easier
- Will not streak or smear on any vehicle surface
- Outstanding dry quality
- Increases paint gloss

Physical Characteristics Features & Benefits:

- Form-liquid
- Fragrance- none
- Color-orange
- Foam- none
- pH- 3.5 to 4.5 (100%)
- Specific Gravity- 1.00

Packaging Size & Product Numbers:

Part #:	Product Size:
27200-CG1	2x2.5g Case

Application Guide / Use Instructions:

Tip size or pump setting will be dependent on water usage, type of equipment the product is being applied through, application speed, etc. Always rinse with fresh or spot free water after application. **Do NOT allow the product to freeze. Do NOT dual inject or mix with other drying agents. Do NOT apply through foaming applications. Air will cause the product to precipitate and clog foamer pads, water lines, and nozzles.**

Recommended Dilutions:

<u>Application</u>	<u>Ratio</u>
Non-foaming	100-200:1
